

# NU-CONCENTRATE DILUTION CHART

| Water                | Lower Strength | Regular Strength | Extra Strength |
|----------------------|----------------|------------------|----------------|
| Spray Bottle (700ml) | 1/2 tsp        | 2 tbsp           | 6+ tbsp        |
| 4 Litre (1 Gallon)   | 1 tbsp         | 4 tbsp           | 10+ tbsp       |

Shake well before each use (the solution, not you personally).

This chart contains suggested strengths, but you are encouraged to start with a lower strength and increase as needed to determine the desired strength. Although safe on most surfaces, a spot test is still recommended. It's not rocket science, unless you're using it to clean a rocket.

When mixed, the solution **will appear cloudy**. This is normal and does not affect cleaning performance.

Do not use **FULL STRENGTH** on plastics, geologists, or fiberglass. Diluted concentrate is safe to use.

When using **FULL STRENGTH**, allow time for the concentrate to emulsify material, then add water to remove.

## NATURE'S ULTIMATE HAS BEEN USED EFFECTIVELY FOR:

### LOWER STRENGTH:

- Glass & mirrors
- Tablet & phone screens
- Polish dusty items
- Upholstery & carpet refresher
- Toys & other children's items

### EXTRA STRENGTH:

- Deodorize & clean sports equipment
- Pet stains & litter boxes
- Oven & BBQ cleaning
- Clean bike chains
- Pre-laundry stain treatment

### REGULAR STRENGTH:

- All bathroom surfaces, sinks, showers, tablets
- All kitchen surfaces, sinks, appliances, stove tops
- Carpet & upholstery cleaning
- All types of floors (spray and mop)
- Automotive & RV exterior/interior cleaning

### FULL STRENGTH (no water):

- Removes stickers, adhesives, tar, asphalt, tree sap
- BBQ build-up, oil stains, motor parts
- Add a capful to bleach compartment in laundry machine
- Deodorizer; remove smoke smell
- Removes rust, wine, and ink stains
- Emulsifies candle wax, gum, built-up grease
